Children with life-threatening and life-limiting illnesses need specialised care to ensure that their pain and other distressing symptoms are expertly controlled and their social, emotional, spiritual, educational and developmental needs are met. Just as a hat protects, members of the children's palliative care team provide the best possible support for these children, their siblings and for all affected family members.

"We can't always add days to a child's life, but we can add life to their days."

Please join #HatsOn4CPC and help us to help them.
